

OutbackWater offers four Do-It-Yourself kits that enable you to build your own gravity powered water purification system. The kits contain all the components required to build the system **except the buckets and lids**. Purchasing the components in this fashion is perfect if you want to build it yourself and also more practical in cases where large quantities of systems are shipped overseas to be assembled at their destination. With the OB-DIY22FF and your own buckets and lids you can build a system for use in virtually any application where potable drinking water is needed. It will effectively remove bad taste, odor, sediment, dirt, bacteria, cysts and chemical contamination. These kits are the perfect complement to your food storage, emergency preparedness, or disaster relief program.

Warranty

OutbackWater Gravity-Powered System components are warranted to be free from defects in materials and workmanship, under normal use, for a period of one year from date of purchase. Premature filter failure due to water of questionable quality is not covered under warranty.

System Features

1. Removes bacteria and cysts at greater than 99%
2. Pre-filter net rated at 100 micron
3. Filter sleeve rated at 20 micron
4. Pleated sub micron pre-filter
5. Safe seal threaded filter connector
6. Simple lever action dispensing spigot
7. Chemical contaminant removal filter capacity rated at 1200 gallons
8. Indefinite shelf life
9. DIY instruction sheet
10. Shipping dimension 12" x 6" x 4" weight 2 lbs
